- JavaScript
- Java

PROJECT

StudyNotion – Full-Stack MERN Ed-Tech Platform |LINK   02-JUNE-25 TO 30-AUG-25
Tech Stack: ReactJS, NodeJS, ExpressJS, MongoDB, Redux, REST API, JWT, Git
- Developed a full-stack educational platform using **MongoDB, Express.js, ReactJS, and NodeJS**, enabling users to create, consume, and rate courses.
- Implemented **user authentication, CRUD operations for courses, and RESTful APIs**, with a responsive UI for an engaging learning experience.

Weather App | LINK
Tech Stack: HTML, CSS, JavaScript, OpenWeatherMap API
- Designed and developed a responsive weather application using HTML, CSS, and JavaScript. • Integrated real-time weather data using OpenWeatherMap API
- Implemented features like location-based weather search, temperature, humidity, wind speed, and weather icon display.

ShopingCart | LINK
Tech Stack: React, Redux, Tailwind
- Built a responsive shopping cart with product listing and add/remove item features using **React** and **Redux** for global state management.
- Designed clean, mobile-friendly UI using **Tailwind CSS**.

Interactive Testimonial Slider | LINK
- Built an interactive testimonial slider in React & Tailwind CSS with navigation buttons, random profile feature, and responsive UI.

Dynamic Blog App |LINK
Tech Stack: React.js, Tailwind CSS
- Developed a blog listing application with pagination, tag-based and category-based filtering using React state and props.
- Implemented a dynamic routing mechanism to load relevant blog content based on tag or heading click.
- Used Tailwind CSS for responsive and modern UI design
